

Market Performance Analytics

DAX Formula Reference · Power BI · By Yogesh Gadekar (YSG)

Table market_performance_india	Rows 1,200 · 39 columns	Currency INR (₹)	Period FY2022-23 → FY2024-25
-----------------------------------	-------------------------	------------------	------------------------------

■ Calculated Columns — Right-click table → New Column

CC-1

Revenue Band

Revenue Band =

SWITCH(TRUE(),

[Gross_Revenue_INR] >= 5000000, "High",

[Gross_Revenue_INR] >= 1000000, "Mid", "Low")

■ Use in slicer or bar chart to group transactions by size

CC-2

Profit Flag

Profit Flag =

IF([Net_Profit_INR] > 0, "Profitable", "Loss")

■ Apply conditional formatting on cards — green/red

CC-3

Specialty Flag

Specialty Flag =

IF([Therapy_Is_Specialty] = TRUE(), "Specialty", "General")

■ Filter high-value drugs in slicer

CC-4

FY Sort Key

FY Sort Key =

SWITCH([Financial_Year],

"FY2022-23", 1, "FY2023-24", 2, "FY2024-25", 3, 99)

■ Sort by Column → FY Sort Key so X-axis order is correct

CC-5

Discount Band

Discount Band =

SWITCH(TRUE(),

[Trade_Discount_Pct] >= 0.20, "High (>20%)",

[Trade_Discount_Pct] >= 0.12, "Medium", "Low (<12%)")

■ Analyse discount impact by band in bar chart

■ Measures — Home → New Measure

M-0
1

Total Revenue

Total Revenue =

SUM(market_performance_india[Gross_Revenue_INR])

■ KPI Card · Format: ■ #,##0,, "L" for Lakhs

M-0
2

Total Net Profit

Total Net Profit =

SUM(market_performance_india[Net_Profit_INR])

■ KPI Card · Bottom-line after all costs

M-0
3

Gross Margin %

Gross Margin % =

DIVIDE(

SUM(market_performance_india[Gross_Profit_INR]),

SUM(market_performance_india[Gross_Revenue_INR]), 0

) * 100

■ KPI Card · India pharma benchmark: 55–70%

M-0
4

Net Margin %

Net Margin % =

DIVIDE(

SUM(market_performance_india[Net_Profit_INR]),

SUM(market_performance_india[Gross_Revenue_INR]), 0

) * 100

■ KPI Card · Healthy range: 15–22%

M-0
5

Total Units Sold

Total Units Sold =

SUM(market_performance_india[Units_Sold])

■ KPI Card · Format: #,##0

M-0
6

YoY Revenue Growth %

YoY Revenue Growth % =

VAR CY = SUM(market_performance_india[Gross_Revenue_INR])

VAR PY = CALCULATE(

SUM(market_performance_india[Gross_Revenue_INR]),

DATEADD(market_performance_india[Txn_Date], -1, YEAR)

)

RETURN DIVIDE(CY - PY, PY, BLANK()) * 100

■ KPI Card · Format: +0.00%;-0.00% · Green if positive

M-0
7

Avg Market Share %

Avg Market Share % =

```
AVERAGE(market_performance_india[Market_Share_Pct])
```

■ Filter by Company to benchmark vs competitors

M-0
8

Revenue by Therapy %

Revenue by Therapy % =

```
DIVIDE(  
SUM(market_performance_india[Gross_Revenue_INR]),  
CALCULATE(  
SUM(market_performance_india[Gross_Revenue_INR]),  
ALL(market_performance_india[Therapy_Area])  
) , 0  
) * 100
```

■ Donut chart · ALL() removes therapy filter context

M-0
9

Total Patients Reached

Total Patients Reached =

```
SUM(market_performance_india[Patient_Count])
```

■ KPI Card · Healthcare impact metric

M-1
0

Avg NPS Score

Avg NPS Score =

```
AVERAGE(market_performance_india[NPS_Score])
```

■ KPI Card · >50 excellent · 30–50 good · <30 action needed
